

React Flooring
The Flooring Solution taking the Industry by Storm.

IRONEDGE

Using the latest rubber technology, React Flooring is at the cutting edge of innovative flooring design.

Maximum Ground Reaction Force

Extreme durability and optimal shock absorption, ensuring minimal energy loss and maximum ground reaction force.

Slip Resistant

React Flooring features an EPDM top layer that offers an anti-slip smooth surface.

Plush Surface

React's plush surface allows for comfortable ground-based training and stretching, even on unforgiving surfaces like concrete.

Performance that excites.

ClearDot™
A Seamless Finish Every Time

Our ClearDot™ proprietary locking mechanism ensures a smooth, no-gap, consistent surface. Achieving a close- to-seamless finish is made easy.

Future-Proof

Gouge, stain, or want to replace individual tiles? Our ingenious design means your floor is future-proofed and easily maintained—interchange like-for-like tiles in seconds at minimal cost.

React Flooring Specifications

1.5mm EPDM Grey Mix

Recycle SBR + Recycle Random EPDM

Additional Specs
1 x 1 Meter Tiles
20mm Thick

Top Layer

Bottom Layer

Your imagination is your limit.

Make your space
yours.

Emblazon your logo on inlay platforms,
or feature a large hero logo. Anything is
possible in your choice of colours and sizing.

React utilises a proprietary printing process
specifically for rubber. The result is vibrant,
high-resolution branding that will lift the look
and feel of your whole training space.

The Solution

With a whopping 400 sqm of gym space, the brief emphasised the need for a premium flooring solution that would add a “wow” factor to the open gym space.

As a finishing touch, CrossFit Ocean Grove has added their logos to the flooring via the inlay platforms and a hero 3x3m feature.
